

Sascha Lee, PhD, MBA

Sascha has over 15 years of experience in life science consulting and entrepreneurship, as well as academic research.

Prior to being a healthcare consultant, Sascha co-taught Medtech Innovation at the UCLA while mentoring several student teams. He is also the cofounder and former Chief Scientific Officer of Sanguine Biosciences, where he led the scientific development of the company.

Sascha earned his Ph.D. in Pharmacology from UCLA, and received his MBA from USC. He also holds an M.S. in genetics and a B.S. in biology from the J.W. Goethe University in Frankfurt, Germany.
